| 🌐 Portfolio | 📁 Coding Profile

Summary

Final year CS student at VIT with hands-on experience building AI-integrated applications, RAG pipelines, LangGraph agents, NLP systems, and full-stack web apps backed by SQL databases. Oracle Java certified. Strong DSA fundamentals, targeting SDE roles with practical backend application development experience in Python and Java.

Education

Vellore Institute of Technology

B. Tech in Computer Science (Core) | CGPA: 8.88

Vellore, India
Aug 2023 – Present

Bhagwan Mahavir International School

Senior Secondary | Percentage: 83.6%

Gujarat, India
2023

L.P Savani School

Secondary | Percentage: 88.86%

Gujarat, India
2021

Skills

Languages: Python, Java, C/C++, JavaScript, TypeScript, SQL

Frameworks & Libraries: Scikit-learn, NumPy, Pandas, Matplotlib, Seaborn, Streamlit, LangChain, LangGraph

Databases: PostgreSQL, SQLite, FAISS, Pinecone (Vector DB)

Platforms & Tools: Git, GitHub, VSCode, Cursor, Jupyter, REST APIs

Core Skills: OOP, Operating Systems, DSA, System Design Fundamentals

Soft Skills: Communication, Teamwork, Time Management, Self-directed Learning

Experience

AI Intern @ La Net Team Software Solution Pvt Ltd., Surat, Gujarat

May 2026 – Jun 2026

- Architected a RAG-based chatbot from scratch using **LangChain** and **LangGraph**, building the full retrieval pipeline (Gemini API embeddings → Pinecone vector search → Ollama local LLM inference) over a repository of 50+ internal company documents.
- Designed the end-to-end document ingestion and query pipeline, enabling accurate Q&A over proprietary knowledge bases with no external data exposure.

AI/ML Intern @ SentiAid, Bengaluru, Karnataka

May 2025 – Jul 2025

- Cleaned and pre-processed a speech/text dataset (4,292 ISL sign videos, AI4Bharat) for an **Indian Sign Language (ISL)** translator using Python, key point detection, and pose-based animation.
- Applied **Pandas**, **Scikit-learn**, and **Regex** to remove noise and align glosses with ASR outputs, improving training data quality.

Projects

LangChain RAG Document Q&A System

May 2026

LangChain, FAISS, Gemini, Groq, Streamlit, Python

- Built an end-to-end **full-stack web application** (Streamlit UI + Python backend) integrating 4 AI APIs (Google Gemini Vision, Gemini Embeddings, Groq LLM, FAISS) for private-document Q&A — users upload PDFs and query them conversationally.
- Cut embedding generation time by $\sim 10\times$ using parallel **ThreadPoolExecutor** (8 workers) and incremental PDF-timestamp caching; unchanged files re-index within **5 sec**.

Resume Feedback System

Oct 2025

Streamlit, SQLite, Gemini API, NLTK, TF-IDF, Python

- Built a **full-stack web app** (Streamlit + SQLite) — an explainable hiring-assist platform that parses resumes, matches skills against JDs, and generates AI-powered feedback via **Google Gemini API** with persistent evaluation history.
- Implemented weighted **ATS scoring engine** — TF-IDF (1,000 features) + cosine similarity for skill-matching ($\sim 70\%$) and section completeness ($\sim 30\%$) — delivering 1–100% explainability scores with skill-gap visualizations.

Obsidian Linker

May 2026

LangGraph, FAISS, Python, Pydantic, asyncio, Groq, Gemini

- Built a **LangGraph agent** with a 7-node pipeline that processes 200+ Obsidian vault notes and auto-generates [[wiki-links]] and #tags using Groq and Gemini as swappable LLM backends.
- Engineered **concurrent LLM calls** with asyncio.gather and MD5 hash-based change detection — zero redundant LLM calls on re-run if no notes have changed, eliminating wasteful API usage.

Student Performance Predictor

Jul 2025

ML, RandomForest, LLaMA, Python

- Trained a **RandomForestClassifier** on quiz/midterm/assignment data achieving **94.5% accuracy** for pass/fail prediction.
- Integrated **Meta's LLaMA** to convert model outputs into personalized, natural-language feedback reports for each student.

Certifications

- Oracle Certified Foundations Associate, Java (1Z0-811) | Oracle University

July 2026
